

Fence Fixing Pins

To enable fencing wire to be fixed down The Fenceline offers a comprehensive range of specially manufactured ground fixings. These fixings can be used to secure netting to the ground in specialist applications or where it is important simply for the bottom of a fencing run to be secured down. Can also be used in new fencing application and with geotextiles.

Wire fixing pins are available 200mm, 300mm, made from 4.0mm gauge wire, with a unique crimp for additional grip. These are ideal for securing down hexagonal netting including rabbit netting. Packed in boxes of 500 pins.

Heavy duty fixing pegs manufactured from strong re-bar steel for tough applications. Two sizes are available 300mm long 8mm re bar and 700mm 12mm re bar. Ideal for fixing in stony ground situation especially in quarry site fencing. Packed in 50s.

Offering additional holding power in soft soils timber fixing pegs provide excellent grip available 300mm, 400mm and 500mm. Packed in 250s.

The heavy duty plastic are manufactured from strong and durable plastic polymer. They can withstand being hammered into the ground, will not break and provide excellent ground holding characteristics.
